

Angelina Lepeshko

• FULL-STACK DEVELOPER

Skills

Technical Skills (Web Development):

- Full-Stack Development with Python, Java, FastAPI, React, and JavaScript
- Advanced UI development with HTML5, CSS3, Tailwind, and Angular
- AI & Automation: OpenAI API, Prompt Engineering, multi-agent systems, n8n, Make.com, LLM integration
- Relational databases: MySQL, SQLite, SQLAlchemy
- REST APIs, JWT authentication, and backend architectures
- Automation and web scraping: Selenium, BeautifulSoup, Pandas
- Deployment and DevOps: Git, GitHub, Docker, Vercel, Netlify, Render
- Tools: VS Code, IntelliJ IDEA, Cisco Packet Tracer

Professional (Soft Skills):

- Independent work with real deliverables in a professional environment (+500 hours)
- Complex problem-solving and fast learning ability
- Effective technical communication in international environments
- Time management and organization in multiple concurrent projects
- Adaptability to changing environments and new technologies

Professional Summary

Full-Stack Developer specialized in AI-powered solutions. I design and develop intelligent systems that automate processes and optimize business operations. Experienced in technology projects across the space, automotive, and marketing sectors.

Work Experience

Backend / AI Developer (Freelance)

OOO AVTOSTART · Remote · 04/2026 – 05/2026

- Developed an AI-powered Telegram bot for searching industrial parts
- Integrated OpenAI API, Telegram API, and a MySQL database
- Implemented compatibility logic between truck models and components

Python · Telegram API · OpenAI · MySQL · Docker

Web Developer — Internship (DAW)

Andreoli Studio · Valencia · 2025 – 2026

- +500 hours of real production code with autonomous deliverables
- Backend development for the AI assistant "Adelia": automated lead follow-up, AI chat, and SEO automation
- Python scraper using Selenium and BeautifulSoup to build a database of industry trade fairs
- Automated FTP deployment and WordPress import with duplicate prevention

Python · PHP · MySQL · IA · Selenium · WordPress

Online Spanish Teacher (Freelance)

Freelance · International · 2019 – 2026

- 7 years managing online classes in 3 languages with international students
- Effective communication, creation of learning materials, and individualized progress tracking

Español · Inglés · Ruso

Education

- Universidad Europea / Higher Vocational Training Degree (Grado Superior) in Web Application Development (DAW)
- MEDAC / Higher Technician in Cross-Platform Application Development (DAM) — 1st year completed
- Self-learning / Python, AI, and Automation
- Kazan Federal University / Additional academic studies

Angelina Lepeshko

• FULL-STACK DEVELOPER

Featured Projects

01 OrbitSpace

React · FastAPI · MySQL · JWT · IA

Full-stack platform for managing satellites and space missions with an integrated AI assistant, JWT authentication, and real-time control panel. Final Degree Project 2025.

orbitspace.vercel.app | github.com/Argenika/orbitspace-backend

02 Earth Risk Dashboard

Python · FastAPI · SQLite · Leaflet.js · Threading

Real-time earthquake monitoring system. Background worker querying the USGS API every 60 seconds, automatic magnitude alerts, and interactive map.

<https://earth-risk-dashboard.vercel.app/> | github.com/Argenika/earth-risk-dashboard

03 Pulse Monitoring

Python · FastAPI · SQLite · Chart.js

Real-time ISS telemetry dashboard. Automatic alerts, orbital speed graph, and background worker using threading.

github.com/Argenika/pulse-monitoring-system

04 Adelia Backend

PHP · MySQL · WordPress · API · IA

Production backend of an AI assistant for SMEs. Automated lead follow-up, AI chat, and SEO automation.

getadelia.com

05 Scraper de Ferias

Python · Selenium · BeautifulSoup

Automated extraction of trade fair data with WordPress import and duplicate control.

github.com/Argenika/scraper-ferias-wordpress

06 AutoStart AI Bot

Python · Telegram API · OpenAI · MySQL

AI-powered Telegram bot for intelligent industrial parts search (KAMAZ, MAZ, Cummins) for a Russian distribution company. Natural language, cross-compatibility matching, and real-time stock queries.

github.com/Argenika/autostart-parts-ai-assistant

07 Mission Control Dashboard

Java · Spring Boot · PostgreSQL · React · Docker

Full-stack real-time satellite telemetry monitoring platform. Spring Boot backend with PostgreSQL and alert generation; React frontend with orbital data visualization and live charts.
